Portfolio Strategies for The Potential Peak in Rates

Source: Bloomberg

Balance Sheet Management for Credit Unions

Low-Rate Strategies

- Minimize Duration
- Focus on Premium Priced Bonds
- Focus on Higher Coupon Bonds
- Negative Convexity OK
- High Cash Flow Bonds
- Buy ARMS & Other Floaters
- Current Pay CMBS
- Deemphasize Prepayment Protection
- 1x Callable Agencies
- Cushion Callables

High-Rate Strategies

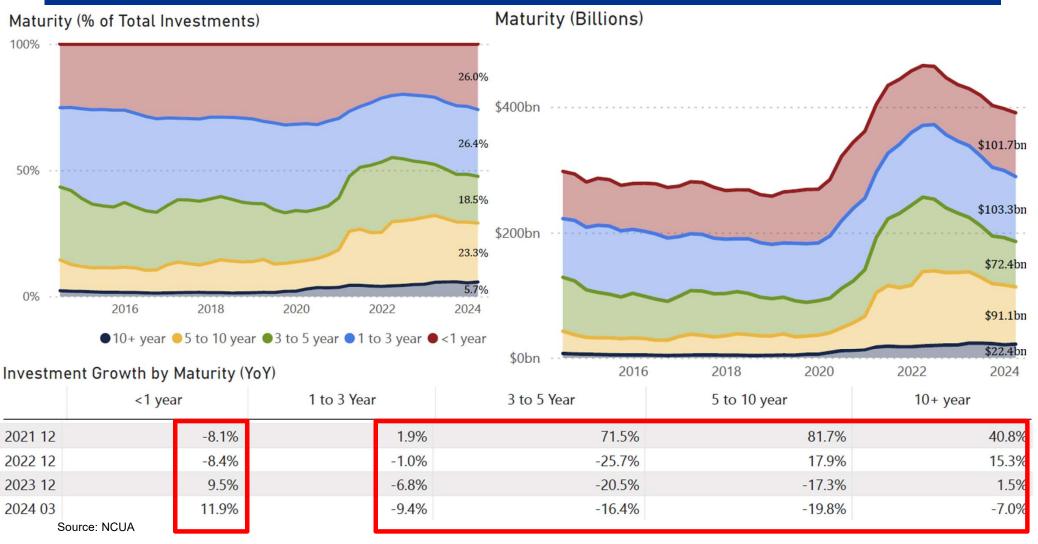

- Maximize Duration
- Focus on Discount Priced Bonds
- Focus on Lower Coupon Bonds
- Reduce Negative Convexity
- Lockout Cash Flows
- Sell ARMS & Other Floaters
- Lockout CMBS
- Emphasize Prepayment Protection
- Bullet Agencies / Extend Calls

Credit Union Investment Trends

NCUA Q2 Chart Pack – Investment #'s

Understand Your Interest Rate Risk Exposure & Balance Sheet Mix

Review Your Model Output for EAR and EVE/NEV

- Earnings at Risk
- Economic Value of Equity and Net Economic Value
- Too much exposure one way or the other can lead to underperformance for earnings and higher risk levels.

Asset Sensitive Institutions

- At risk when rates <u>decrease</u>
- Shorter Duration, Floating Rate Assets
- Lower Deposit Betas

Balanced / Neutral Interest Rate Risk Institutions

- Understand the dynamics between borrowing and lending and how their customers maximize their own utility
- Fixed Rate Assets, Low Deposit Betas
- Floating rate Assets, High Deposit Betas

Liability Sensitive Institutions

- At risk when rates increase
- Longer Duration, Fixed Rate Assets
- High Deposit Betas

Balance Sheet Management for Banks and Credit Unions

Asset Sensitive

- Increase Overall Asset Duration
- Deploy Cash
- Increase Fixed Rate Loans
- Bonds: Extend Duration, Positive Convexity
- Decrease Overall Liability Duration
- Shorten Funding FHLB Borrowings
- Receive Fix, Pay Float Swaps
- LOAN FLOORS
- Floors, Sell Caps

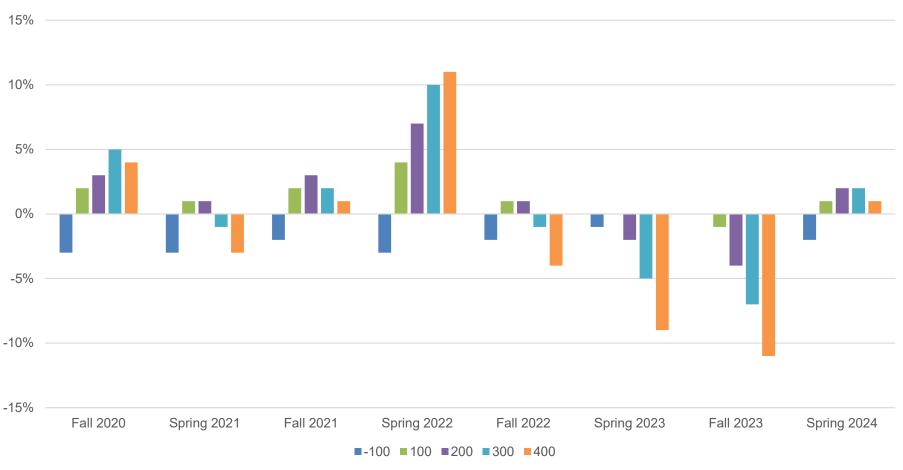

Liability Sensitive

- Decrease Overall Asset Duration
- Increase Cash Holdings
- Increase Floating Rate Loans
- Bonds: Decrease Duration, Negative Convexity
- Increase Liability Overall Duration
- Term Funding FHLB Borrowings
- Receive Float, Pay Fix Swaps
- Caps, Sell Floors

2024 Vizo Financial Conference

Portfolio Management – Managing Duration / Price Risk

Portfolio Duration: Key Decision When Investing in Fixed Income Portfolio

- Average Portfolio Yields on Short vs Long Treasury Ladders
- Short: Earns less yields when rates are low/rising, less depreciation
- Long: Earns more yield over time, outperforms when rates fall, more depreciation
- Balanced Approach: Barbell Strategy
- Understand YOUR Cash Flows

Source: Bloomberg, each line represents the yield earned on given a pro-rata roll for each maturity. (3Mo = 3 months, 2Yr = 24 months, 5Yr = 60 months, 10Yr = 120 months)

F

Balance Sheet Management for Banks and Credit Unions

Asset Sensitive

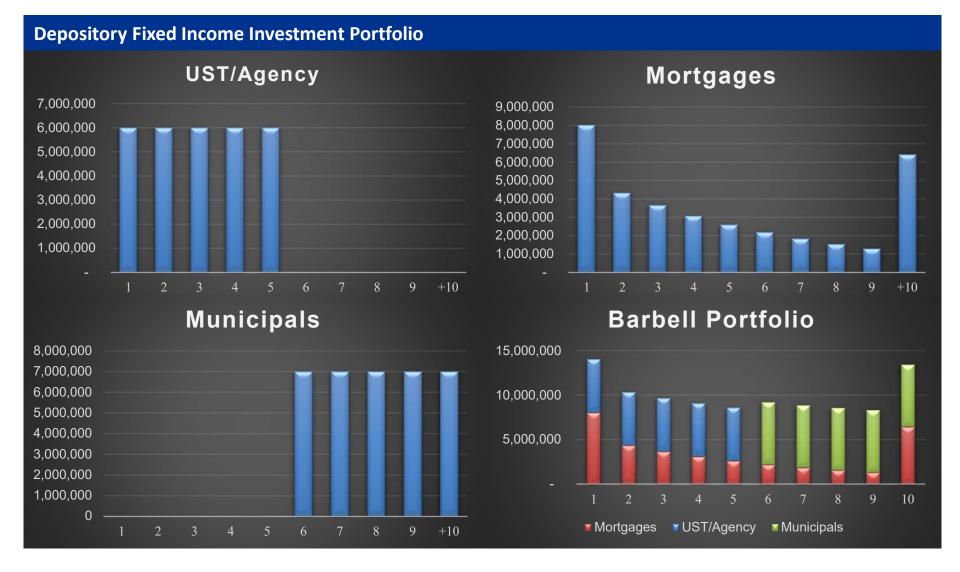

- Buy Longer Bullets
- Buy MBS (Prepayment Protection)
- Buy CMBS DUS or K-Deals
- Buy CMOs with Lock Outs
- Limit Floaters, Ladder Reset Dates
- SBA Pools Fixed Rate
- Swaps Pay Floating Rate
- DISCOUNT PAPER

Liability Sensitive

- Sell Longer Bullets
- Ladder Short Bullets & Callables (Cushion)
- Buy MBS (Prepayment Protection)
- Buy CMOs with Current Pay
- Add Floaters, Focus Resets < 1 Year
- SBA Pools Floaters
- Swap Pay Fixed Rate
- PREMIUM PAPER

Portfolio Cash Flows

Muni Tax Equivalent Yield Table

Focus on Call Protection in Today's Environment

Loan Attributes & Prepayment Impact

Loan Attribute	Call Protection		Prepay Characteristics
Low Loan Balance	~	1	 Smaller loan amounts don't benefit as much from refinancing Fixed refinance costs and lower dollar savings reduce refi incentives for these borrowers, offering some call protection Lower priced homes experience higher turnover as borrowers trade up, offering some extension protection
Seasoned Loans	1	1	 Seasoned loans offer some call protection due to burnout effect Sufficiently seasoned loans also have shorter amortization schedules, offering some extension protection
New Production	~	×	• Infrequent turnover and refi activity in the first few months after origination results in slower speeds (call protection) in the short-term
Shorter Term (10-20 years)	×	\checkmark	Shorter term mortgages offer some extension protection due to shorter amortization schedules
Geography	v	×	 Costs and origination requirements in certain states make it more difficult for residents to refinance, creating some call protection on collateral from specific states
Investor	√	×	 GSEs charge higher costs for loans with undesirable characteristics like non-owner occupancy These borrowers face additional origination costs and underwriting hurdles making it harder for them to refinance, which creates some call protection
High LTV	√	×	 GSEs charge higher costs for loans with undesirable characteristics like high LTVs High LTV borrowers face additional origination costs making it harder for them to refinance, which creates some call protection
Low FICO	\checkmark	×	 GSEs charge higher costs for loans with undesirable characteristics like low credit scores Weak credit limits the borrower's ability to secure a mortgage and they face additional origination costs and underwriting hurdles making it harder for them to refinance, which creates some call protection
Bank Servicing	~	×	 Non-bank servicers exhibit substantially faster refinance speeds compared to their bank counterparts They tend to be more efficient in processing and more aggressive in soliciting borrowers, which increases prepayment sensitivity Bank serviced loans offer some call protection
Retail Origination Channel	1	×	• Third-party originators have economic incentives to encourage borrowers to refinance and are more likely to prepay than retail originations
Jumbo	×	×	 Jumbo loans are the antithesis of low loan balance loans Dollar incentives to refinance are large when rates fall, which creates reinvestment risk Disincentives to relocate/refi when rates rise are also large locking these borrowers in, which creates extension risk
